

SEE YOU THERE

April 2022

As we enter the month of April there is a lot to look forward too...

Easter, spring break and summer plans should be organized by now (hopefully) and I for one always try and extend the summer. Ocean, river, lakes... I will take it all. I personally love adventure so I am only able to lie by the pool or beach for about 30 minutes before I need to get moving and do something. For those of you who like to chill with a book or just sun bathe, great - I can make it work. If you're like me who want activities galore, I can definitely make that happen too. This month I am featuring some of the most beautiful destinations I have been to or have on my to do list in order to be surrounded by water.

Island style like you've never experienced!

Ready to go? Me too!

Being surrounded by water is always a good idea

Get ready to make lasting memories.

Step one, we will establish your ideal scenario. Beach vs city vs interests.

If island style is not what you're after, there are plenty of incredible cities near the water or surrounded by water. Maybe you're over being in the sun and shade is your go to... no problem.
